POLIFILM AUTOMOTIVE CENTER

DEFINITION OF SURFACE PROTECTION TRANSIT FILMS

Transportation protection films protect cars during transportation by road, rail and sea. In this environment, the protective film is in demand not only for scratch protection, but also as protection against other environmental contaminants such as bird droppings, brake dust or sparks from the overhead lines for many months.

TRUE BENEFITS FOR THE OPERATOR

- Tear strength
- Resistant to chemicals
- High Flexibility and stretchability
- Balanced adhesion level
- Long service life

Product name	Application	Color	Thickness	Adhesion Level
PFC 253/10	Outer body	White	70µm	Medium
MF 16045	Outer body	White	60µm	Medium
MF 16044	Outer body	White	50µm	Medium

OTHER SURFACE PROTECTION FILM SOLUTIONS IN THE AUTOMOTIVE CENTER

- Rocker Panels
- Faceplates
- Lamp Housing
- Carpets
